

CORAL REEF WORDSEARCH!

- Coral reefs are one of the most important **ECOSYSTEMS** in the world.
- They are very colourful and have lots of places for marine animals to live. In fact, they are often known as the **RAINFORESTS OF THE SEA** as there are so many animals that live there!
- They cover less than 1% of the ocean's surface but contain over 25% of all marine species!

Can you find all of the different animals that may live in a coral reef below?

- Coral
- Turtle
- Clownfish
- Angel fish
- Sea urchin
- Moray eel
- Pufferfish
- Stingray
- Reef shark
- Octopus
