

A Plastic Clever Cafe would...

Hot drinks:

If a hot drink is ordered, you (the cafe) will ask if the customer has a reusable mug to put the drink in. If they don't, then you will tell them that a discount is given to reusables and to bring one next time. If they do have a reusable, then you will give them a discount.

Water bottles:

If the customer wants to buy a plastic bottle, then you will ask if they have a reusable bottle. If they don't then tell them that you give free bottle refills if people have reusable bottles. If they do, then fill up their bottle instead of them buying a plastic bottle.

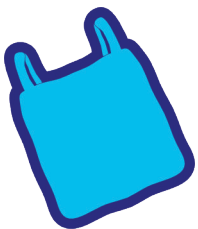

Straws, lids and stirrers:

If a customer orders a drink, you shouldn't automatically give a straw with it. If they request a straw, ask if they own a reusable one. If they do, then don't give the straw with their drink. If they don't, then give them a straw but only if they say they need it. Lids for hot drinks are only given if asked for and instead of giving out plastic stirrers, reusable spoons are to be used.

Plastic bags:

Plastic bags aren't given out automatically and if they are asked for you should ask if they have a reusable bag. If they do, give them their items without a plastic bag. If they don't have a reusable, give them a bag.

Cutlery:

Don't give any unless asked for and provide reusable cutlery
