

A Plastic Clever Festival ...

Gives **FREE** tap water refills

If festival goers come and ask for a top-up of water say '**YES!**' and fill up their refillable container with a welcoming smile.

Gives discounts to people using reusable cups for hot drinks

To help reduce the amount of non-recyclable coffee cups that get used and find their way into incinerators or landfill (or the environment) encourage the use of **reusable** beakers, mugs and cups.

Straws and lids are **ONLY** given out when asked for

Ideally, **no straws** would be used or given out, but where this is not possible, discourage their use by only offering them when they are specifically asked for.

NO single-use plastic bags are offered to festival goers

There's no excuse for **ANYONE** using a single-use plastic bag these days, particularly not a responsible festival.

Uses reusable cutlery where possible

Single-use plastic cutlery is only given out when asked for and when reusable cutlery cannot be used or isn't available.

NB. Plastic Clever Festivals should also try and reduce the number of single-use plastic bottles that are sold by vendors.
