

PAPER PLATE SKATE!

This is the perfect craft if you have any paper plates or bowls left over after a party!

Materials needed:

- A paper plate
- A paper bowl
- Paint
- Glue
- Googly eyes
- Stapler

1. Cut the middle circle out of a paper plate.
2. Put it over the top of an upside down paper bowl and glue down the edges. This will form the body of the skate.
3. Use the left over piece of card from the paper plate to cut out a skate tail.
4. Paint your plate/bowl and the tail before leaving them to dry.
5. Staple the tail onto the back of the skate's body.
6. Decorate your skate with stripes, spots or other patterns using paint or stickers.
7. Lastly, curl the edges up along the sides of your skate and add googly eyes!

Did you know that skates have a skeleton made of cartilage instead of bone? This allows them to move easily through the water when searching for their dinner!
