

The BIG 4 Plastic Polluters

2. Bottles

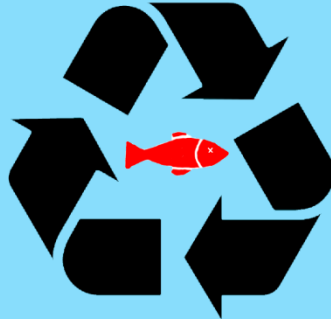

Plastic bottles are used for an average of 12 minutes before being thrown away.

They last forever in the environment.

The Recycling Red Herring

The majority of plastic bottles are NOT recycled into new bottles.

Instead they are down-cycled into fleeces, carpets etc

100ml of oil is used to make one 500ml bottle!

Bottles are littered and make their way into rivers and streams.

Be Plastic Clever

Get rid of single-use plastics
