

The BIG 4 Plastic Polluters

4. BAGS!

Sales of single-use carrier bags dropped by 95% when a 5p charge was introduced.

Thousands of animals are killed by plastic bags each year.

Turtles mistake them for jellyfish

The amount of petroleum in a plastic bag is enough to fuel a car for 11 metres.

A plastic bag is used for an average of about 12 minutes.

A whale was found dead with 4kg of plastic bags in its stomach.
